

Parma, 5 April 2011

Consolidated list of Article 13 health claims

List of references received by EFSA

Part 1

IDs 1 – 1000

(This document contains the list of references for claims which the Commission has asked EFSA to prioritise in the evaluation.)

BACKGROUND

In accordance with Article 13 of Regulation (EC) No 1924/2006¹ Member States had provided the European Commission with lists of claims accompanied by the conditions applying to them and by references to the relevant scientific justification by 31 January 2008.

EFSA has received from the European Commission nine Access databases with a consolidated list of 4,185 main health claim entries with around 10,000 similar health claims. The similar health claims were accompanied by the conditions of use and scientific references. The nine Access databases were sent in three batches - in July 2008, in November 2008 and in December 2008.

Subsequently, EFSA combined the databases into one master database and re-allocated upon request of the Commission and Member States similar health claims which had been accidentally placed under a wrong main health claim entry (misplaced claims). During this process some Member States also identified a number of similar health claims which still needed to be submitted to EFSA (“missing claims”). These similar claims were also added to the database.

In March 2010, the European Commission forwarded to EFSA an addendum to the consolidated list containing an additional 452 main entry claims which have been added to the updated final database which was published on the EFSA website in May 2010 (containing 4,637 main entry claims).

The references to the scientific justifications provided by Member States were either included in the database or were provided in separate files. In addition, full-text copies of references were provided directly to EFSA from stakeholders. The deadline for submission of these references was end of 2008. EFSA wishes to acknowledge the full-text copies of relevant literature provided by stakeholders until that date. In some instances, references provided to EFSA were referring to papers which were submitted for publication. In case the publication had in the meanwhile taken place EFSA has included the correct citation in the list of references and this may result in some references carrying a 2009 or 2010 publication date.

¹ Regulation (EC) No 1924/2006 of the European Parliament and of the Council of 20 December 2006 on nutrition and health claims made on foods. OJ L 404, 30.12.2006, p. 9–25.

EFSA has screened all health claims on the list using six criteria established by the NDA Panel to identify claims for which EFSA considers sufficient information has been provided for evaluation and those for which more information or clarification is needed before evaluation can be carried out. The claims which had been sent back to the Commission and the Member States for further clarification in January 2009 were received back with additional information in November 2009.

Further information can be found on the EFSA website under the following link:
http://www.efsa.europa.eu/EFSA/efsa_locale-1178620753812_article13.htm.

LIST OF REFERENCES

The present document compiles the lists of references for claims with ID numbers between 1 and 1000 and which the Commission has asked EFSA to prioritise in the evaluation. The list takes into account references provided through different sources and those coming from misplaced or missing claims. The main health claim entries are sorted in ascending order of the ID number.

This document has been updated according to the progress of adoption of opinions related to Article 13 health claims. References for ID numbers which have been added to the document after the last update of 4 October 2010 have been highlighted in red font.

TABLE OF CONTENTS

Table of contents.....	3
ID 1: “Vitamins, in general” and “Development, growth, body maintenance, body metabolism and equilibrium”	34
ID 2: “All vitamins” and “Reproduction”	34
ID 3: “All vitamins” and “Conception”	35
ID 4: “All vitamins and minerals” and “Multivitamin supplementation to sustain vitality while aging”	36
ID 5: “All vitamins and minerals” and “Vitamins and minerals during pregnancy and lactation”	36
ID 6: “Vitamins, minerals, lysine and/or arginine and/or taurine” and “Nutritional support during the period of growth for physical development”	37
ID 7: “Vitamins, minerals, trace elements and omega-3 fatty acids (incl. DHA)” and “Supply and maintenance of normal levels of vitamins, minerals, trace elements and fatty acids (DHA) in pregnant and lactating and non-lactating women, as well as for women planning to become pregnant”	38
ID 8: “Vitamins, minerals, trace elements and standardized ginseng G115 extract (Pharmaton capsules, film coated tablets, effervescent)” and “To cover increased needs of vitamins, minerals, trace elements and Ginseng G115 extract specifically in cases of exhaustion, tiredness, feeling of weakness, decreasing concentration as well as decreasing mental alertness”	38
ID 9: “Vitamins, minerals, trace elements and standardized ginseng G115 extract (Pharmaton Activit G effervescent tablets)” and “Physical and mental health”	39
ID 10: “All vitamins, minerals and trace-elements” and “The role of vitamins and minerals during pregnancy and lactation”	40
ID 11: “B vitamins (Riboflavin (B2), Niacin, Pyridoxine (B6), vitamin B12, Biotin, Pantothenic Acid, Folic Acid), vitamin C, calcium, magnesium and zinc” and “Stress management”	40
ID 12: “All vitamins, minerals and trace-elements” and “Weight management”	41
ID 13: “Vitamin A” and “Bone growth and development of teeth”	41
ID 14: “Vitamin A” and “Cell differentiation including immune system ”	42
ID 15: “Vitamin A” and “Structure and function of the skin and mucous membranes (such as in the lung, intestines, nose, eyes and female reproductive tract)”	46
ID 16: “Vitamin A” and “Vision ”	47
ID 17: “Vitamin A” and “Bone/Teeth/Hair/Skin and Nail health”	49
ID 18: “Vitamin A” and “Energy and Vitality”	50
ID 19: “Beta carotene” and “Antioxidants and aging”	50
ID 20: “Vitamin B1 (Thiamin)” and “Cardiac function”	53
ID 21: “Vitamin B1 (Thiamin)” and “Energy and Carbohydrate metabolism”	54
ID 22: “Vitamin B1 (Thiamin)” and “Neurological function”	56
ID 23: “Thiamin (B1)” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	57
ID 24: “Vitamin B1” and “Macronutrient metabolism”	57
ID 25: “Vitamin B1” and “Bone/Teeth/ Hair / Skin and Nail health”	58
ID 26: “Vitamin B1” and “Energy and Vitality”	58
ID 27: “Vitamin B1” and “Neurological and cardiac systems”	58

ID 28: “Thiamin” and “Thiamin participates as a coenzyme in the carbohydrate metabolism”	59
ID 29: “Vitamin B2 (Riboflavin)” and “Energy metabolism”	59
ID 30: “Vitamin B2” and “Transport and metabolism of iron”	61
ID 31: “Vitamin B2” and “Required for the normal structure of mucous membranes (such as the surface of the tongue, the mouth, eyes and intestines).”	61
ID 32: “Vitamin B2” and “Mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning, as well as resistance to stress)”	62
ID 33: “Vitamin B2” and “Bone/Teeth/ Hair / Skin and Nail health”	63
ID 35: “Riboflavin” and “Riboflavin participates in oxidation-reduction reactions in numerous metabolic pathways and in energy production via respiratory chain”	63
ID 36: “Riboflavin (vitamin B2)” and “Macronutrient metabolism”	64
ID 37: “Riboflavin (vitamin B2)” and “Healthy iron status”	64
ID 38: “Riboflavin (Vitamin B2)” and Fetal Growth”	64
ID 39: “Riboflavin (vitamin B2)” and “Eyes”	64
ID 40: “Riboflavin (vitamin B2)” and “Red blood cells”	64
ID 41: “Riboflavin (B2)” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	64
ID 42: “Riboflavin (B2)” and “Release of energy from food”	65
ID 43: “Niacin (Vitamin B3)” and “Energy metabolism Nutrient utilisation”	65
ID 44: “Niacin” and “Neurological functions”	66
ID 45: “Niacin” and “Normal structure and function of skin and mucous membranes (such as the intestines)” ...	67
ID 46: “Niacin (nicotinic acid)” and “Blood lipids”	67
ID 47: “Niacin” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	68
ID 48: “Niacin” and “Structure and function of skin”	69
ID 49: “Niacin” and “Macronutrient metabolism”	69
ID 50: “Vitamin B3” and “Bone/Teeth/ Hair / Skin and Nail health”	69
ID 51: “Vitamin B3” and “Energy and Vitality”	70
ID 52: “Niacin (Vitamin B3)” and “Skin and mucous membranes”	70
ID 53: “Niacin (Vitamin B3)” and “Neurologic system”	70
ID 54: “Niacin ” and “NAD and NADP. These nucleotides are key components of oxidation-reduction reactions, ATP synthetic pathways and ADP-ribose transfer reactions.”	70
ID 55: “Niacin” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	71
ID 56: “Pantothenic Acid (Vitamin B5)” and “Fat and carbohydrate metabolism”	71
ID 57: “Pantothenic Acid” and “Mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning, as well as resistance to stress)”	73

ID 58: “Pantothenic Acid” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	73
ID 59: “Pantothenic Acid” and “Macronutrient metabolism”	74
ID 60: “Vitamin B5 (Pantothenic Acid)” and “Energy metabolism”	74
ID 61: “Vitamin B5 ” and “Bone/Teeth/Hair/Skin and Nail health”	74
ID 62: “Vitamin B5” and “Energy and Vitality”	74
ID 63: “Pantothenic Acid” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	75
ID 64: “Pantothenic acid ” and “Metabolism of fat”	75
ID 65: “Vitamin B6 (pyridoxine)” and “Protein and Glycogen/ stored carbohydrate metabolism”	75
ID 66: “Vitamin B6 (pyridoxine)” and “Nervous system function”	77
ID 67: “Vitamin B6 ” and “Transport and metabolism of iron”	78
ID 68: “Vitamin B6 ” and “Immune system function”	78
ID 69: “Vitamin B6 ” and “An essential co-factor in fatty acid metabolism that impacts upon hormonal health”	79
ID 70: “Vitamin B6 (Pyridoxine)” and “Protein metabolism”	80
ID 71: “Vitamin B6” and “Glucose and macronutrient metabolism”	82
ID 72: “Vitamin B6” and “Blood health”	82
ID 73: “Vitamin B6” and “Homocysteine levels”	83
ID 74: “Vitamin B6” and “Bone/Teeth/ Hair / Skin and Nail health”	84
ID 75: “Vitamin B6” and “Energy and Vitality”	85
ID 76: “Vitamin B6” and “Heart Health”	87
ID 77: “Vitamin B6” and “Heart Health”	89
ID 78: “Pyridoxine (B6)” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	90
ID 79: “Folate/ Folic acid (Vitamin B9)” and “Blood formation”	90
ID 80: “Folate/ Folic acid (Vitamin B9)” and “Homocysteine metabolism ”	93
ID 81: “Folate” and “Mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning, as well as resistance to stress)”	98
ID 83: “Folate” and “Eye health”	101
ID 84: “Folic Acid” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	102
ID 85: “Folic acid” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	102
ID 86: “Folate” and “Cognitive function”	103
ID 87: “Folic acid” and “Eye health, folic acid with vitamin E and C”	104
ID 88: “Folic acid” and “Cognitive health”	105
ID 90: “Folic acid” and “The role of water-soluble vitamins in energy metabolism / transformation of food into physiological energy”	105

ID 91: “Folic acid” and “The role of vitamins and minerals in immunity”	106
ID 92: “Vitamin B12 (cyanocobalamin)” and “Blood formation”	107
ID 93: “Vitamin B12 (cyanocobalamin)” and “Cell division (such as in the gastrointestinal tract)”	110
ID 94: “Folic Acid (Vitamin B9)” and “Vascular function / Cardiovascular health ”	111
ID 95: “Vitamin B12 (cyanocobalamin)” and “Neurological system: structure and function ”	115
ID 96: “Vitamin B12 (cyanocobalamin)” and “Homocysteine metabolism”	116
ID 97: “Vitamin B12” and “Neurological system: structure and function”	119
ID 98: “Vitamin B12” and “Cognitive function in ageing”	121
ID 99: “Vitamin B12” and “Energy metabolism: propionate and amino acids”	123
ID 100: “Vitamin B12” and “Structure and function of the neurological system”	123
ID 101: “Vitamin B12” and “Blood function”	124
ID 102: “Vitamin B12” and “Nerve system and cognitive function”	124
ID 103: “Vitamin B12” and “Homocysteine levels”	124
ID 104: “Vitamin B12” and “Bone/Teeth/ Hair / Skin and Nail health”	125
ID 105: “Vitamin B12” and “Energy and Vitality”	125
ID 106: “Vitamin B12” and “Heart Health”	125
ID 107: “Vitamin B12” and “The role of vitamins and minerals in immunity”	126
ID 108: “Vitamin B12” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	127
ID 109: “Vitamin B12” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	128
ID 110: “Vitamin B12” and “Neural Tube Development”	128
ID 111: “Vitamin B12” and “Strong healthy bones”	128
ID 112: “Folic acid, vitamins B12, B6” and “Homocysteine metabolism”	130
ID 113: “Biotin” and “Protein and amino acid metabolism”	130
ID 114: “Biotin” and “Fat, carbohydrate, energy metabolism”	130
ID 115: “Biotin” and “Normal structure and function of skin and mucosa”	131
ID 116: “Biotin” and “Neurological system function”	132
ID 117: “Biotin” and “Fat metabolism and energy production”	133
ID 118: “Biotin” and “Hair Growth & Follicle Formation”	134
ID 119: “Biotin” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status“	134
ID 120: “Biotin” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	134
ID 121: “Biotin” and “Bone/Teeth/ Hair / Skin and Nail health”	135
ID 122: “Biotin” and “Energy and Vitality”	136
ID 123: “Vitamin K” and “Bone structure”	136
ID 124: “Vitamin K1 + K2” and “Hearth health”	141

ID 125: “Vitamin K2” and “Vascular health ”	141
ID 126: “Vitamin K” and “Blood coagulation”	144
ID 127: “Vitamin K” and “Bone integrity”	145
ID 128: “Vitamin K” and “Bone calcification”	146
ID 129: “Vitamin C” and “Protection of body tissues and cells from oxidative damage. Antioxidant activity/Antioxidant”	146
ID 130: “Vitamin C” and “Structure and function of blood vessels”	147
ID 131: “Vitamin C” and “Connective tissue - structure and function: bones, teeth, gums, skin, healing processes. Normal collagen formation”	149
ID 132: “Vitamin C” and “Iron absorption ”	152
ID 133: “Vitamin C” and “Neurological system function”	153
ID 134: “Vitamin C” and “Immune system function”	157
ID 135: “Vitamin C” and “Energy metabolism: carnitine biosynthesis”	161
ID 136: “Vitamin C” and “Healthy gums”	162
ID 137: “Vitamin C” and “Healthy skin”	166
ID 138: “Vitamin C” and “Antioxidants and ageing”	167
ID 139: “Vitamin C” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	167
ID 140: “Vitamin C” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	167
ID 141: “Vitamin C” and “Eye health, free radical scavenger”	168
ID 142: “Vitamin C” and “Eye health”	169
ID 143: “Vitamin C” and “Cell protection from free radical damage”	170
ID 144: “Vitamin C” and “Oxidative stress” and “Acts as antioxidant and helps protect the body tissues against the potentially damaging effects of free radicals”	171
ID 145: “Vitamin C” and “Energy and Vitality”	172
ID 146: “Vitamin C” and “Promotes the antioxidative function of lutein”	172
ID 147: “Vitamin–C 1” and “Due to its reducing power vitamin C can improve absorption of non-haem iron”	173
ID 148: “Vitamin – C 2” and “Antioxidant properties”	173
ID 149: “Vitamin-C 3” and “Vitamin C is a cofactor for several enzymes involved in the biosynthesis of collagen”	173
ID 150: “Vitamin D” and “Bone health/bone strength. Includes bone structure, bone mineralisation, bone density”	174
ID 151: “Vitamin D” and “Teeth mineralization”	178
ID 152: “Vitamin D” and “Absorption and utilisation of Calcium, Phosphorus”	179
ID 153: “Vitamin D” and “Cell division”	184
ID 154: “Vitamin D” and “Immune system”	185
ID 155: “Vitamin D” and “Muscle”	191
ID 156: “Vitamin D” and “Endocrine/thyroid metabilsm”	192

ID 157: “Vitamin D” and “Normal blood calcium levels”	192
ID 158: “Vitamin D” and “Normal bone and tooth formation”	193
ID 159: “Vitamin D3” and “Vitamin D3 has long been known to aid in calcium absorption, but new research shows that D3 also plays a role in cardiovascular function and supports healthy inflammatory response”	194
ID 160: “Vitamin E” and “Protection of body tissues, cells, membranes and lipids from oxidative damage (such as the oxidation of polyunsaturated fatty acids in red blood cell membranes). Antioxidant activity” ...	194
ID 161: “Vitamin E” and “Normal immune system function”	198
ID 162: “Vitamin E” and “The role of vitamins and minerals in immunity”	201
ID 163: “Vitamin E” and “The role of vitamins and minerals in immunity”	205
ID 164: “Vitamin E” and “Bone/Teeth/Hair/Skin and Nail health”	208
ID 165: “Vitamin E” and “Energy and Vitality”	209
ID 166: “Vitamin E” and “Heart health”	209
ID 167: “Vitamin E” and “Eye health; vitamin E, C are found in the lens of the eye; acts jointly with vitamin C”	210
ID 168: “Vitamin E” and “Eye health”	211
ID 169: “ZMA (comprises the minerals zinc and magnesium, and also contains vitamin B6)” and “Supports an increase in muscle strength when taken in conjunction with resistance exercise”	212
ID 171: “Dexpanthenol” and “Energy metabolism”	212
ID 172: “Dexpanthenol” and “Fat metabolism”	212
ID 173: “Multivitamin-mineral products” and “Bones and teeth “	212
ID 174: “Multivitamin-mineral products” and “Skin, hair and nails”	213
ID 175: “Folic acid (syn.: Vitamin B9)” and “Cardiovascular health”	213
ID 176: “Calcium L-methylfolate (syn.: L-5-methyltetra-hydrofolic acid, calcium salt; Vitamin B9), Metafolin™” and “Cardiovascular health”	216
ID 178: “Beta carotene” and “Skin ageing/skin health”	219
ID 179: “Beta carotene in combination with vitamin C and E” and “Eye health and vision”	221
ID 181 “Vitamin B5 (Pantothenic acid)” and “Synthesis and metabolism of steroid hormones, A, D, B12 vitamins, neurotransmitters”	224
ID 182: “Vitamin E” and “Antioxidant activity and cognitive function”	224
ID 183: “Vitamin E” and “Mental state and performance”	225
ID 184: “Group B vitamins” and “Carbohydrates and energy metabolism”	225
ID 185: “Vitamin B6” and “Mental state and performance”	225
ID 186: “Name of Food product: Vitamin B6 Description of food in terms of food legislation categories: food not covered by specific food legislation. Was food on Irish market before 1st July 2007: Yes” and “Health benefits of food: Vitamin B6 helps the body effectively use iron. Do benefits relate to a disease risk factor: No. Target group: All adults aged 18 years and over”	226
ID 190: “Name of Food product: vitamin b12. Description of food in terms of food legislation categories: food not covered by specific food legislation. Was food on Irish market before 1st July 2007: Yes” and “Health benefits of food: vitamin b12 and energy metabolism. Do benefits relate to a disease risk factor: No. Target group: All adults aged 18 years and over”	226
ID 192: “Name of Food product: Folic Acid/ folate. Description of food in terms of food legislation categories: food not covered by specific food legislation. Was food on Irish market before 1st July 2007:	

No” and “Health benefits of food: Folate helps keep arteries/ blood vessels healthy. Do benefits relate to a disease risk factor: No. Target group: All adults aged 18 years and over”	226
ID 193: “Name of Food product: Folate/ Folic Acid. Description of food in terms of food legislation categories: food not covered by specific food legislation. Was food on Irish market before 1st July 2007: Yes” and “Health benefits of food: Folic Acid is essential for cell division. Do benefits relate to a disease risk factor: No. Target group: All adults aged 18 years and over”	228
ID 195: “Vitamine B9 Complément alimentaire” and “la Folate (Vitamine B9) participe au métabolisme des protéines”	228
ID 197: “B-caroten” and “Protection of tissues and skin against oxidant agents (sun rays exposure) Antioxidant activity”	228
ID 198: “Beta-carotene” and “Immune health in relation to UV-radiation”	231
ID 199: “Vitamin B6 (Pyridoxine)” and “Homocysteine metabolism”	231
ID 200: “Beta-Carotene” and “Immune health/Immune function”	233
ID 201: “Beta carotene in combination with vitamin E and vitamin C” and “Eye health and vision”	234
ID 202: “Vitamin C” and “Regeneration of vitamin E, have synergistic effects”	237
ID 203: “Vitamin E” and “Regeneration of vitamin C, vitamin C and vitamin E have synergistic effects”	237
ID 204: “Pantothenic acid (B-5)” and “Adrenal function”	237
ID 205: “Thiamin (B1)” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	237
ID 206: “Vitamin A” and “Metabolism of iron”	238
ID 207: “Riboflavin” and “Antioxidant properties”	238
ID 208: “Panthotenic acid” and “Carbohydrate and amino-acid metabolism”	238
ID 209: “Vitamin A” and “Oxidative Stress. Acts as antioxidant and helps protect the body tissues against the potentially damaging effects of free radicals.”	238
ID 210: “Folsäure und Vitamin B12 (Cobalamin)” and “Knochendichte/Knochengesundheit“	238
ID 211: “Niacin” and “niacin enhances the blood flow because of its vascular dilatation effect”	239
ID 212: “Vitamin B12” and “supports folic acid metabolism, in succession: DNA synthesis”	239
ID 213: “Vitamin B2” and “nervous system: formation of the myelin sheath”	240
ID 214: “Vitamin B6“ and “muscle metabolism: shares in biochemical reaction which are needed for muscle contraction”	240
ID 215: “Vitamin D3” and “Vitamin D3 steigert die Resorption von Calcium aus dem Darm, indem es in der Dünndarmschleimhaut die Bildung eines calciumbindenden Proteins induziert”	240
ID 216: “Vitamin E” and “blood circulation”	240
ID 217: “All minerals” and “Development”	241
ID 218: “Boron” and “Bone health”	241
ID 219: “Boron” and “Joint health/Bone metabolism”	245
ID 220: “Boron as boric acid” and “Joint health”	247
ID 221: “Boron as boric acid” and “Prostate health”	249
ID 222: “Boron as boric acid” and “Thyroid health”	250
ID 223: “Boron as boric acid” and “Mental health”	250

ID 224: “Calcium” and “Bone health/ bone strength (includes bone structure, bone mineralisation, bone density), structure of teeth”	251
ID 225: “Calcium” and “Blood pressure”	261
ID 226: “Calcium” and “Muscle function”	262
ID 227: “Calcium” and “Nerve transmission/function”	266
ID 228: “Calcium” and “Weight management”	267
ID 229: “Calcium in dairy products” and “Weight management”	272
ID 230: “Calcium” and “Required for general body health: Bones and teeth; Nerves and muscles; Coagulation.”	276
ID 231: “Calcium” and “Structure of teeth”	279
ID 232: “Calcium” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	281
ID 233: “Calcium” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	282
ID 234: “Calcium” and “Calcium is also required for the activation of numerous enzymes involved in energy metabolism”	282
ID 235: “Calcium” and “Nerve and muscle function”	282
ID 236: “Calcium” and “Blood coagulation”	283
ID 237: “Calcium” and “Colorectal cell protection”	284
ID 238: “Magnesium” and “Electrolyte balance”	287
ID 239: “Magnesium” and “Bone and teeth structure - necessary for building strong bones and teeth”	289
ID 240: “Magnesium” and “Energy metabolism/Normal cellular energy supply”	294
ID 241: “Magnesium” and “Normal muscle contraction including normal heartbeat”	295
ID 242: “Magnesium” and “Nerve transmission/ function”	298
ID 243: “Magnesium” and “An essential co-factor in fatty acid metabolism, that impacts upon hormonal health”	299
ID 244: “Magnesium” and “Vitamin/mineral supplementation to reduce fatigue and tirednes in situations of inadequate micronutrient status”	300
ID 245: “Magnesium” and “The role of vitamins and minerals in mental performance (where mental performance stands for those aspects of brain and nerve functions which determine aspects like concentration, learning, memory and reasoning)”	301
ID 246: “Magnesium” and “Brain function”	302
ID 247: “Magnesium” and “Magnesium is an essential cofactor for more than 300 enzymes involved in biosynthetic processes and energy metabolism.	302
ID 248: “Magnesium” and “Normal energy metabolism”	304
ID 249: “Iron” and “Red blood cell and haemoglobin formation”	304
